SUMMARY

Senior full-stack engineer with **5 years of experience** building scalable **SaaS products** and **AI-driven platforms**, spanning high-concurrency messaging, e-commerce workflows, and distributed systems.

WORK EXPERIENCE

BusinessOnBot, YC W21 – Bengaluru, India

Senior Software Engineer

May 2024 – Present

- Built an **AI agent platform** for support, sales, and marketing workflows across web chat, WhatsApp, and voice, deployed across **220+ customers** with response latency reduced from **12s to 2-4s**.
- Extended the **AI agent platform with voice workflows** for brand-specific use cases, with an initial COD confirmation rollout reducing high-risk shipments by **18-21% over 8 weeks**.
- Led the expansion of the platform into the **Support Inbox**, shaping the agent experience and coordinating delivery across workflows and integrations while reviewing **designs, PRs and mentoring engineers** through implementation.
- Re-engineered the **omnichannel messaging platform** across WhatsApp, email, Instagram, webchat, and voice with realtime updates, per-user event ordering, and async processing, handling **10K+ simultaneous conversations**.
- Drove a foundational re-architecture of the **Angular dashboard**, transforming a tightly coupled codebase into a modular frontend platform with shared modules and isolated feature domains, **cutting the main bundle by 66%**.
- Re-architected the **storefront widget ecosystem** into a shared platform with session management and merchant-configurable behavior, powering **1M+ interaction events/day** and reducing brand-specific customization.
- Standardized software delivery across **10+ services and applications** with reusable GitHub Actions, regression checks, health verification, and rollback, reducing manual **release effort by 80%**.

Software Engineer

Apr 2023 – Apr 2024

- Scaled the **Shopify platform** to **700+ merchants** and **600K API calls/day at 200 ms P95**, reducing large historical **order and customer backfills** from **3-4 hours to under 30 minutes**, including runs with **2M+ orders**.
- Owned the **Shopify public app and self-serve merchant onboarding flow**, reducing time-to-live from **2-3 weeks to 1-2 days** and cutting integration-related payment failures by **80%**.
- Built an event-driven alerting system for critical WhatsApp and email notifications, processing **3K+ alerts/month** with retries, backoff, DLQ handling, and backlog monitoring for **reliable delivery**.

Keka HR Technologies – Hyderabad, India

Software Engineer & Intern

Feb 2021 – Aug 2022

- Built **Helpdesk 2.0** across Angular and .NET with inbox workflows, ticket assignment, SLA visibility, and real-time notifications, improving **first-response time by 30%**.
- Built an employee exit survey workflow that increased completion by **60%**, and modernized legacy Razor Pages to Angular and .NET 6 with **40% faster page loads**.

EDUCATION

GITAM, Visakhapatnam

Jun 2017 – Jun 2021

B.Tech in Computer Science & Engineering, GPA: **8.88/10**

SKILLS

Frontend: Angular, React, TypeScript

Backend: Node.js, Python

AI & Retrieval: LLMs, AI Agents, RAG, Qdrant, LangChain

Architecture: Microservices, Event-Driven Systems, Micro Frontends

Data: PostgreSQL, MySQL, DynamoDB, MongoDB, Redis, Elasticsearch

Cloud & Platform: AWS, Azure, Docker, Temporal, SQS, Kafka, GitHub Actions
